

## **Section 1**

### **1.0 Objectives of the MSMP**

The objective for the MSMP is to ensure that:

- All assessed risks are effectively managed through the design and operation of the mooring system

- During mooring operations:

- no harm comes to the ship's crew or terminal staff

- no damage is caused to the ship or terminal/facility it is interfacing with

- the mooring system meets any applicable regulations, codes and recommended practices

All stakeholders/concerned parties should ensure:

- The MSMP is appropriately created.

- Ship operators and ship builders should collaborate from the earliest stage in the ship's design to ensure risks are reduced through mooring design and risk reviews.
